

PLeeFiX™ Markers **Important Safety Notice**

SAFETY INSTRUCTIONS

Please carefully review all of the following safety instructions prior to installing the PLeefiX™ markers. KEEP this PLeefiX™ Safety Notice and the "Instructions for the planting of PLeefiX™ markers" in a safe place for easy reference.

READ ALL instructions in this PLeefiX™ Safety Notice before attempting to plant the PLeefiX™ markers. Only use the PLeefiX™ markers in the ways described in this PLeefiX™ Safety Notice. Failure to follow the PLeefiX™ Safety Notice and Instructions for the planting of PLeefiX™ markers could result in serious injury and or property damage.

PLeefiX™ markers are manufactured in a state of the art manufacturing facility. Please understand that Pointmarkers, Inc. sells PLeefiX™ markers to various distributors on a worldwide scale. PLeefiX™ markers have different uses but are always used as reference points in natural grass sport play areas, in athletic stadiums, as indicators of underground water pipes, gas lines, cemetery markers, electrical cables, underground tanks, etc. Pointmarkers, Inc. produces the PLeefiX™ markers for those uses mentioned above. There may be other uses for the product that Pointmarkers, Inc. is unaware of. If questions about PLeefiX™ markers' uses arise, please contact Pointmarkers, Inc.'s support at contact@pleefix.com. PLeefiX™ markers are intended for natural grass fields, not for synthetic fields.

PLeefiX™ markers are not toys or play things.

Only an iron mallet should be used to plant PLeefiX™ markers.

PLeefiX™ markers can be planted in hard ground surfaces. Before planting, using a small chisel, make a hole in the ground where the PLeefiX™ marker will be located, pour a small amount of water into the hole to soften the soil, and then follow the Instructions for planting a PLeefiX™ marker.

Because the soil has a tendency to move due to weather conditions and regular sports, check that the PLeefiX™ markers are correctly in place, by attempting to pull them each out by hand. If unable to pull the PLeefiX™ markers out, they are firmly in place. If you are able to pull the PLeefiX™ markers out by hand, please replant them in a different location.

Should you need to pull out a PLeefiX™ marker, you must use a shovel.

The DRIVING TOOL has two openings which are different.

The larger DRIVING TOOL opening should be placed on top of the PLeefiX™ marker and the smaller opening should be used to insert the stem of the safety cap.

The PLeefiX™ marker was manufactured for the spiral cone to be planted in the grass. The spiral cone must not be visible to the naked eye. Only the fibers should be visible when planted correctly. The fibers should be surrounded by sand to protect them, in order for the colored fibers to better be seen. If the spiral cone is visible, the PLeefiX™ markers have not been planted correctly which will increase the likelihood of an injury.

CHECK the sports fields BEFORE cutting the grass to avoid PLeefiX™ markers being pulled out.

PLeefiX™ markers have been designed to be placed in grass sports fields and the DRIVING TOOL indicates a 1.1811 inches (3 cm) calibration. If you alter the sticker on the DRIVING TOOL, you are altering the height of the fibers, and you are altering the usual height at which the lawn mower cuts the grass.

The base of the spiral cone must be 1.5748 inches (4 cm) under the level of the ground. 1.1811 inches (3 cm) fibers must be seen by the naked eye.

REMEMBER to use sand to separate the fibers. If you fail to place sand between the fibers, the fibers will stick together and they will likely not be seen by the naked eye.

Please regularly check the PLeefiX™ markers, especially during extended breaks from field usage, to make sure the PLeefiX™ markers' base cones have not heaved or moved above the surface.

WARNINGS

If these Warnings below are not followed it could lead to bodily harm or breakage of the PLeefiX™ markers.

If PLeefiX™ markers are not installed correctly as indicated in the Instructions for the planting of PLeefiX™ markers, it could cause bodily harm to any individual walking or running over the PLeefiX™ markers.

PLeefiX™ markers should be thoroughly inspected to make sure no part of the spiral cone is showing before any activities are conducted over the area where the PLeefiX™ markers are installed.

Persons under the age of fifteen (15) should not be using nor planting PLeefiX™ markers.

DO NOT place a flame against PLeefiX™ markers, the DRIVING TOOL nor the safety cap as they will melt and could cause serious injury.

PLeefiX™ markers should not be used for any other purpose than for being planted in natural grass to be used as reference point.

PLeefiX™ markers must not be used on synthetic fields.

CAUTION should be exercised when striking the PLeefiX™

markers. The safety cap has been devised to prevent any harm to the hands when hitting it with an iron hammer.

Extra caution should be exercised with PLeefiX™ markers when maintaining the grass. Aeration procedures may damage the PLeefiX™ markers if contact is made. Scarification, raking, coring, slitting and verticutting may also damage the PLeefiX™ markers.

In order to avoid breaking the PLeefiX™ markers, groundskeepers may place the markers on the side of the fields instead of in the play surfaces.

DO NOT attempt to plant a PLeefiX™ marker with anything other than the SAFETY CAP and the DRIVING TOOL provided. Pointmarkers, Inc. accepts no responsibility for damages resulting from alterations to the PLeefiX™ markers. If the SAFETY CAP and DRIVING TOOL are not used the individuals run the risk of experiencing an injury to their fingers or hands and run the risk of breaking the PLeefiX™ markers.

The PLeefiX™ markers should NOT be planted in soil that is too sandy because the markers could easily be loosened.

Should you wish to mow your natural grass sports field closer to the ground, you will need to adjust the PLeefiX™ markers height accordingly.

DO NOT remove the yellow sticker on the DRIVING TOOL.

DO NOT place concrete in around the PLeefiX™ markers or between the fibers.

DO NOT use other tools to install the PLeefiX™ markers. Use the tools provided to install the PLeefiX™ markers.

PLeefiX™ markers should not be inserted into any part of the body, should not be used as a comb or as a brush, should not be used as a fingernail cleaner, and should not be used as a body decoration in any fashion.

DO NOT insert any part of the PLeefiX™ markers into a nose, mouth, eyes, or other bodily orifice.

STAY ALERT and watch what you are doing when you are installing the PLeefiX™ markers. Use common sense.

DO NOT PLANT PLeefiX™ markers in unmaintained and high grass areas.

DO NOT place PLeefiX™ markers in walls.

DISCLAIMERS

Pointmarkers, Inc. disclaims any responsibility for injuries or damages sustained by any person or property caused by improper use or improper installation of the PLeefiX™ markers by the purchaser, or by any other person.

Pointmarkers, Inc. is not responsible for improper planting or removal of the PLeefiX™ markers.

Pointmarkers, Inc. cannot be held liable for the deliberate misuse of the "Instructions for the planting of PLeefiX™ markers".
